Managers shall maintain the general investment style and risk level as stated at time of hiring unless VSC is specifically notified in advance otherwise. - Maintain minimum assets under management of \$250 million.

Plan Objectives and Time Horizon

Time Horizon

Risk Tolerances

In establishing the market risk tolerances of the Plan, the ability to withstand short and intermediate term variability was analyzed. The Board of Trustees and Finance Committee recognize that "moderate" risk and volatility, including periods of portfolio declines, must be assumed in order to achieve the long-term investment objective of prudent capital appreciation.

As a general guideline, the assumed risk on Fund assets is targeted to be less than the projected volatility of U.S. domestic equities as measured by the Standard & Poor's 500 Stock Index and greater than a portfolio comprising 50% of the Standard & Poor's 500 Stock Index and 50% the Barclay's Aggregate Bond Index.

Performance Expectations and Investment Objectives

The rate of return on the Fund is expected to meet or exceed the rate of return for the composite of 45% of the Standard & Poor's 500 Stock Index, 20% the MS EAFE International Stock Index and 35% the Barclays Intermediate Aggregate Bond Index. Over the long run, the investment goal for the average annual rate of return is 7½%.

Spending Policy

The Board of Trustees has set the annual withdrawal and spending to be the lesser of 5% of the current market value or 5% of the average market value over the last three years. Actual spending will be limited by the amount of unspent earnings available at the time the spending allocation is

Every investment manager selected to manage fund assets must adhere to the following investment policy and guidelines. If mutual funds are employed, only those that meet the following relevant criteria shall be selected:

- Equity holdings in any one company should not exceed more than 10% of the market value of the Plan's equity portfolio.
- The manager shall have the discretion to invest a portion of the assets in cash reserves when they deem appropriate. Cash is to be employed productively at all times by investment in short term cash equivalents to provide safety, liquidity and return. Nonetheless, the managers will be evaluated against their peers on the performance of the total funds under their direct management.

Brokerage Policy

All transactions effected for the Fund will be subject to the best price and execution.

Monitoring of Investment Managers

Quarterly performance will be evaluated to monitor progress toward the attainment of longer-term targets. It is understood that there are likely to be short-term periods during which performance deviates from market indices. During such times, greater emphasis shall be placed on performance comparisons with managers employing similar styles.

On a timely basis the Advisor will assess each asset manager relative to the following:

- Overall adherence to the IPS guidelines.
- Material changes in the managers' organization, investment philosophy and/or personnel.
- Comparisons of the managers' results to appropriate indices and peer groups.
- Comparison of Up/Down market capture ratios.
- Other comparisons as agreed to by the Chancellor and the Advisor.

Review of this Investment Policy Statement

The Finance and Facilities Committee will review these guidelines on an annual basis or in the interim whenever substantive changes to the guidelines are proposed by the Chancellor.
